

Sabari Vishnu Jayanthan Jaikrishnan

Staff AI / ML Engineer | Production AI & ML Systems

Ontario, Canada | jsvishnuj@gmail.com | +1 437 837 7675 | [linkedin.com/in/jsvj](https://www.linkedin.com/in/jsvj)

Professional Summary

Staff AI Engineer with 7 years of experience building production AI platforms, Generative AI solutions, and intelligent decision systems. Passionate about applying AI to large-scale user experiences, personalization, analytics, and decision-making products.

Career Highlights

- Built production GenAI, RAG, and agentic AI platforms using Python, AWS Lambda, Claude API, embeddings, vector search, MCP tool servers, Docker, Kubernetes, and CI/CD deployment patterns.
- Delivered enterprise AI systems across 3 global operations, standardizing reusable ML workflows and stakeholder adoption models that automated 80% of critical operational decisions.
- Productionized AI/ML systems with measurable impact, including reducing knowledge-discovery cycles from 40+ hours to minutes, improving machine utilization by 16%, and mitigating ~\$12M in annual hardware-defect losses.

Technical Skills

- **GenAI:** Generative AI, Agentic AI, RAG pipelines, prompt engineering, hallucination mitigation, retrieval-grounded generation, embeddings, vector search, semantic search, chatbot development, Claude API, OpenAI API, MCP
- **AI / ML:** Deep Learning, Computer Vision, Predictive ML, Time Series Forecasting, Classification, Regression, Clustering, A/B Testing, Anomaly Detection, Risk Detection
- **Engineering:** Python, SQL, JavaScript, React, Node.js, Flask, FastAPI, REST APIs, Microservices
- **ML Frameworks:** TensorFlow, PyTorch, pandas, NumPy, scikit-learn
- **Cloud / MLOps:** GCP, AWS, AWS Lambda, Docker, Kubernetes, CI/CD, model deployment, scalable inference, production monitoring, Git
- **Data / Analytics:** Apache Kafka exposure, PostgreSQL, MongoDB, MySQL, Dataiku, Power BI, Tableau, TIBCO Spotfire, Matplotlib.

Leadership & Delivery

Led cross-functional AI initiatives delivering production-grade systems; drove AI product adoption, defined KPIs aligning ML outcomes with business impact and ROI, and partnered with stakeholders to convert operational needs into scalable technical solutions.

Work experience

Staff Data Scientist (official title: Data Scientist III) | **Western Digital (WD)** | January 2021 – Present

- Designed and deployed an agentic AI decision-support platform using Windsurf, Python, MCP tool servers, and retrieval-grounded reasoning to automate KPIV optimization workflows, enabling scalable **AI-assisted operational decision-making** while reducing hallucination risk through evaluation-driven prompt engineering.
- Architected and productionized an internal cloud-native GenAI insights platform using AWS Lambda, Claude API, vector embeddings, semantic retrieval, and prompt orchestration, **reducing enterprise knowledge-discovery cycles from 40+ hours to minutes** while improving response reliability, scalability, and stakeholder adoption.
- Led multi-site production AI platform delivery across 3 global operations, standardizing reusable ML workflows, deployment patterns, monitoring practices, and stakeholder adoption **models that automated 80% of critical decisions** and improved operational reliability.
- Architected and deployed a Kubernetes-enabled real-time computer vision analytics pipeline using TensorFlow SSD, HLS streaming, Python, React, and Node.js to monitor Man-to-Machine Ratio and **improve machine utilization by 16%**, contributing to **WEF Lighthouse Award (2023)**.
- Led the design and production deployment of a CI/CD-enabled predictive ML pipeline to identify hidden hardware-defect patterns responsible for **~\$12M annual losses**, converting reactive failure analysis into proactive risk mitigation.
- Mentored junior and intermediate engineers, led technical reviews, and aligned cross-functional stakeholders on AI delivery priorities, improving engineering quality, adoption, and business-value realization.

Systems Engineer | **Infosys Pvt. Ltd.** | June 2016 – June 2018

- Engineered automated data exploration services using Oracle Fusion Middleware and SOA architecture to modernize a legacy billing system, integrating SQL, XML, and REST APIs to enable scalable, production-grade data access
- Designed & implemented reusable data processing pipelines for transforming and validating high-volume enterprise data, improving data consistency & reliability for downstream analytics & modeling workflows
- Translated business requirements into data-driven solutions by collaborating with cross-functional stakeholders, identifying inefficiencies in legacy workflows and driving scalable system improvements
- Developed an enterprise data warehouse integration by developing backend data workflows and enabling seamless data flow between transactional systems and reporting layers

Education

- **Master of Science in Information & Data Science**
King Mongkut's University of Technology North Bangkok, Thailand – 2020 | CGPA: 4.0 / 4.0
- **Bachelor of Technology in Electronics & Communication Engineering**
SRM University, India – 2016 | CGPA: 8.5 / 10
- **Publication:** "Knowledge Gate: A Personalized Gateway for Secure and Custom LLMs," PSECE, 2025
